

Regions & Availability Zones

Regions

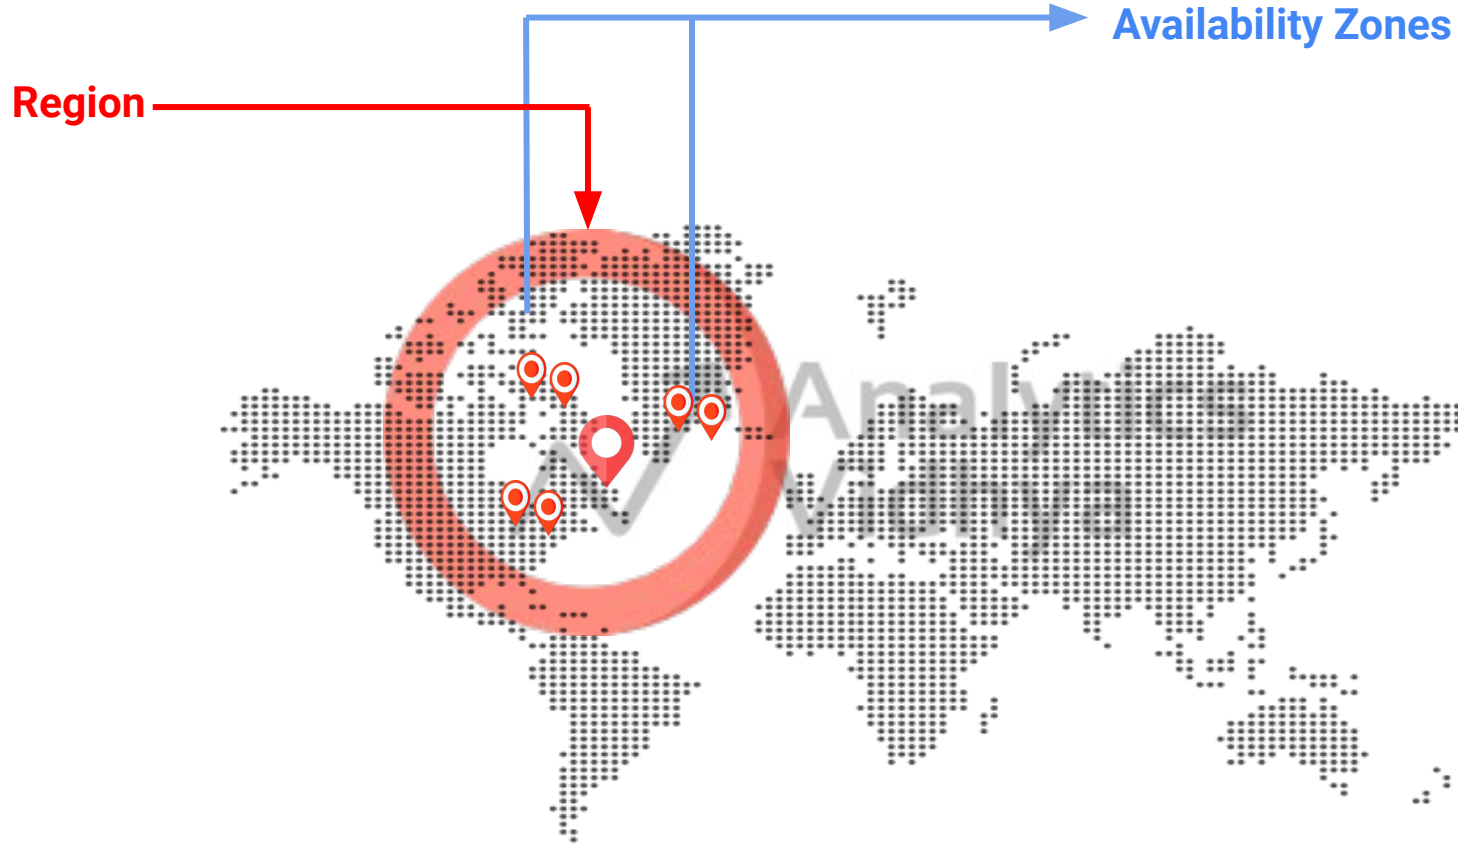

Regions

- Azure builds Regions, where the business traffic demands.
- Data centers are connected to each other through a high performance network.
- Each Region is isolated from every other Region.

Availability Zones

AWS Global Infrastructure

- 60+ Announced Regions
- 140 Countries and Territories Served

Selection a Region

→ Compliance with data governance and legal requirements.

→ Proximity to customers.

→ Available services within a region.

→ Pricing

Thank You!!
